

Medication distribution systems

Developed to support the medication
processes and to increase patient safety

Medication distribution system - Storage, preparation and dispensing

Developed by professionals for professionals

Wiegand has been developing integrated solutions for medication management in hospitals, retirement and nursing homes and outpatient care for almost 50 years. The Wiegand system features extensive and flexible solutions - from central warehousing, to setting up and equipping nurses' wards and pharmacies, to individual distribution of medications at patient's bedsides. Preparing, dispensing, storing and transporting - all from a single source.

Wiegand solutions ideally complement each other and can be combined to meet individual needs. Thanks to close cooperation with care professionals, pharmacists and doctors throughout Europe, the systems are constantly tested and further developed. We support you with the introduction or changeover of medication processes and help you choose the right system for your institution.

Swiss Made

The Wiegand medication distribution system is manufactured in Switzerland and conforms to all standards and guidelines. We place great emphasis on the highest quality of materials and processing. Wiegand works with partners from Switzerland wherever possible and expects high quality standards and the best service from each partner.

Tailor-made solutions

Medication processes vary considerably in their logistical structure. A nursing home that is administered centrally or even supplied externally with prepared medication has different workflows than a medical or surgical department in a clinic or hospital. The Wiegand system can be individually configured and therefore adapted to your processes and needs.

Wiegand systems can be individually combined

In addition to the medication distribution system, Wiegand also offers supplementary trolley systems, furnishing concepts and logistics solutions. This means that processes can be comprehensively addressed and efficiently coordinated with each other.

Comprehensive range

Wiegand can supply a comprehensive range of MediDispensers, blister boxes, distribution and storage trays and everyday accessories. The individual products can be combined to form systems or used individually. MediDispensers, MediCups and trays can be labelled with patient specific data to support patient safety. This is why Wiegand offers a comprehensive range of labels and holders. We provide advice on your choice of system and ensure that it is suited to your preparation cycle, dispensing process and storage conditions.

WIEGAND® MediDispensers – versatile and flexible

The WIEGAND® MediDispensers were developed to support professionals in ensuring patient safety during the dispensing of medication.

The WIEGAND® MediDispensers are available in various sizes and come with different labelling options. Suitable labels can be found from page 10 onwards and in our online shop.

MediDispenser individually printed

The labelling of MediDispensers supports patient safety and helps to make medication processes efficient. To relieve the nursing staff, a selection of our MediDispensers are available printed in different lan-

guages. Would you like our MediDispensers printed with the day of the week and/or dispensing times? Please contact us, we will be happy to help you.

Labellings for WIEGAND® MediDispensers

A MediDispenser must be clearly assignable to each patient. This is why it is useful to label the MediDispensers with names, rooms, dispensing times or even the respective doctor's prescriptions. Wiegand

provides ready-made Word forms for a variety of labels, which make it easier for you to fill them in on the computer. The templates can be found on our website.

Label extra small

- For labelling MediDispensers and medicine containers
- Self-adhesive, removable

Distribution trays - safe distribution of medicines

Fixing the MediDispenser and MediCup on the distribution tray enables safe distribution of medicines even when the pace is hectic and space is tight. The low weight of the distribution tray and the flexible organisation support the medication dispensing process. Thanks to the clear overview this provides, administration errors are easily avoided.

Whether you're working with MediDispenser, blister bags or MediCup at the moment – the Wiegand distribution trays lend themselves to a wide range of uses. Our team will be happy to help you in your search for the right distribution trays for your medication process.

Week systems - Solutions for long-term therapies

Week trays provide space for 7 to 8 MediDispensers. This makes preparation possible for the week ahead. In the case of trays with 8 MediDispensers, the medication to be dispensed on that day is always allocated accordingly while the new week ahead is

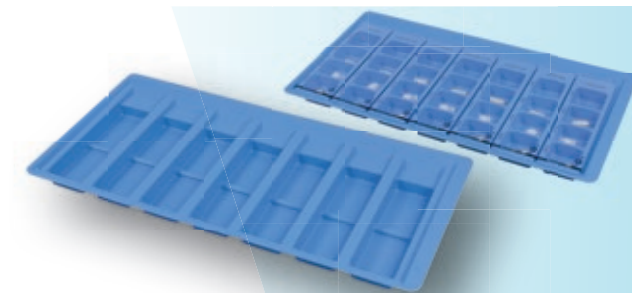

prepared. The Week trays can be placed in Wiegand FlexLine trolleys and Wiegand cabinets, thereby enabling even clearer and more practical storage and distribution of medications per patient.

Art. No.	191-1	1 pc. week container
	191-30	30 pcs. week containers

Accessories	99-199	Sliding lid for week container
--------------------	--------	--------------------------------

WIEGAND® WiBox pro

Wiegand has developed a weekly system in cooperation with the Spitex Association and Spitex Organisations, which has been designed specifically for the needs of people taking medication at home or on the move. The WiBox pro weekly set facilitates safe transport, including the individual daily dispensers, as well as quick, easy and safe handling of the medicines for an entire week.

The WiBox pro allows patients to keep an overview of their medication supply - both at home and on the go. This also gives additional support to the nursing staff. Also suitable for external preparation.

Week set WiBox pro

- Set contains 1 case, 7 day dispenser, printed with MONDAY - SUNDAY and MORNING/NOON/EVENING/NIGHT and 1 additional MediDispenser without weekday, for the reserve medicines
- Day dispenser with green locking pin can be locked individual
- Case lockable, e.g. with a padlock
- Dispenser and case can be labeled with waterproof markers or labels
- Dimensions: Case 190x225x50 mm / Dispenser 190x45x20 mm
- Available in English

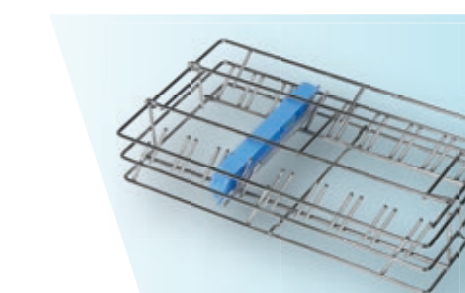

Art. No.	230.00.01.en	1 pc. week set English
	230.00.01.en-10	10 pcs. week sets English

Basket for dish washer WiBox pro

- Basket for dish washer for cleaning 8 day dispensers and sliding lids
- Dimensions: 369x201x69 mm

-----------------	-----------	------------------------------

Case for WiBox pro day dispenser

- Textile case for the storage of a day dispenser
- Protects the day dispenser from scratches and dirt
- Colour: blue
- Dimensions: 195x87 mm

Art. No.	230.00.61.bl	1 pc. case
-----------------	--------------	------------

External preparation

Safe transport

The preparation of medications for homes by external or internal pharmacies places specific demands on the transport aids required for this purpose. The Wiegand CollectBox and TransportBox have been specially developed for the transport of prepared medications in Wiegand distribution systems. The Wiegand weekly systems can be transported safely and practically in the precisely fitting CollectBoxes or TransportBoxes. To ensure that no unauthorised changes have been made to the medication, the boxes can be sealed

Advantages for pharmacies

- Gradual adaptation of the infrastructure to growing needs
- Financially and organisationally independent of large supply centres
- The Wiegand CollectBox and TransportBox concept does not require GMP approval
- Easy acquisition of new customers and solid customer retention

Advantages for care homes

- Increased medication safety in long-term care
- Comprehensive concept from transport to storage to administration of medication to residents
- Secure transport solutions for existing systems
- Time saving process for nursing staff
- Optimisation of work processes
- Competent contact person for questions regarding medication

WIEGAND® TransportBox

The Wiegand TransportBox is the suitable transport solution for the medium-sized Wiegand MediDispensers 41/49, 61/69, 341/349 and 141/149. It allows the transport and external preparation of the dispensers directly on the weekly trays 491 or 991. The TransportBox is very light and can be transported easily thanks to the large handles.

TransportBox

- In a TransportBox is space for the medication of a whole week for 10-12 patients
- Can be secured with a seal
- Dimensions: 705x270x295 mm

Art. No.	140.000.200	1 pc. TransportBox
Accessories	491	Week tray for MediDispenser 141/149
	991	Week tray for MediDispenser 41/49, 61/69 or 341/349

WIEGAND® CollectBox

The Wiegand CollectBox is the suitable transport solution for the large Wiegand MediDispensers 271/279 and 281/289 in combination with the transport tray 1291. The CollectBoxes can also be supplemented with Treston containers, for example to transport reserve medications or ointments.

CollectBox

- In a CollectBox is space for the medication of a whole week for 5-10 patients
- Can be secured with a seal
- Dimensions: 600x400x435 mm

Art. No.	CB.BT.6040.44	1 pc. case
	CB.TR.6040.44	1 pc. door
Accessories	1291	Transport tray for 7 MediDispensers 271/279 or 281/289
	3020-1	Treston container, 186x300x82 mm
	3010-1	Treston container, 92x300x82 mm
	RO6040.gr	Transport frame with 4 solid rubber steerable wheels

Storage and distribution of medication in blister packs

Blistering is a variant of external preparation. This involves the mechanical preparation of prescribed tablets by a blister machine or device. The blister packs can be easily integrated into existing Wiegand distribution systems.

The hygienic and durable Wiegand BlisterBoxes store a patient's blister pack for one or two weeks and can be easily unrolled and detached.

BlisterBox duro

- Dispenser for the storage and distribution of pharmaceutical blister bags
- For the weekly medication of a patient
- The BlisterBox duro is machine washable, but can also be washed easily by hand
- Dimensions: 87x127x120 mm

Holder for blister bags or labels

- Suitable for attaching a blister bag to a distribution tray or as a label holder
- Also for FlexModul trays and baskets
- Available in 2 sizes

Art. No.	500.240XO.075	1 pc. holder 75x40mm
	500.240XO.100	1 pc. holder 100x40 mm

Accessories	600018.1W	Storage label 75x40 mm, white
	600015.1W	Storage label 100x40 mm, white

WIEGAND® Starter-sets blistering

The starter sets support the distribution process of blistered pills in blister packs. The set includes one label holder per resident, a practical holder for the blister pack and a MediCup for dispensing the de-blistered pills. The necessary patient data and the patient picture can be printed on the enclosed labels and the labels can be stuck on the label holders

provided. This increases medication safety, as an additional visual check can take place through the patient picture. The enclosed MediDispenser can be used for the medication of new patients.

Starter-set blistering S

- The Starter-set blistering S is ideal for the distribution of medication in blister pack for up to **5 residents**
- The distribution tray has 10 grooves and 30 positions for MediCups
- Dimensions distribution tray: 260x300mm

Set consisting of:
